## PROJECTS

### CLASSIFICATION OF COUNTRIES BASED ON IMAGES USING MACHINE LEARNING

- In this project, I developed a machine learning application in Python to classify countries based on images.
- The project utilized fundamental programming concepts, statistics, and advanced machine learning techniques to build and train a Convolutional Neural Network (CNN) model.
- By leveraging the power of Numpy and Matplotlib libraries, I achieved accurate and visually interpretable results.

### DEVELOPED A PORTFOLIO USING HTML & CSS.

- Created a personal portfolio using html and css.

### DEVELOPED A SPOTIFY CLONE USING HTML & CSS.

- I completed a project that involved creating a basic Spotify clone using HTML, CSS.
- It is a responsive and user-friendly web application that allows users to play music.
- I used HTML and CSS to design and style the interface, and I implemented JavaScript to handle user input and interaction such as basic playback controls -play, pause, and next.

### DEVELOPED A TO-DO LIST USING HTML ,CSS & JS.

- This is a simple web application for managing your tasks. You can add tasks, edit them, and delete them as needed. The application is built using HTML, CSS,JS.
